Open-Ended Responses

1. In what ways did your instructor try to make learning possible for you during the semester?

Comments
Andrey made the midterms accessible, and made the grading for the problem sets/programming assignments easy to manage during the summer session.
The questions for the midterms were fair, if a bit hard. Otherwise, the lecture notes did a good job explaining some of the math.
Excellent remote instructions
The course was entirely online, and recordings of each class are posted in time for students who cannot participate. Midterms are extended to 24 hours so we could finish any time we have time.
When I had an issue about an assignment and emailed him, he made sure to go over the concept in class the next day! I was very appreciative.
